

ACESULFAME POTASSIUM

ADVANTAGES :

- It is a high-intensity sweetener that is 200 times Sweeter than sugar.
- It has a clean, sweet taste with a fast onset and no lingering aftertaste.
- It is calorie-free and suitable for diabetics.
- It is not metabolized by the body but is excreted unchanged.
- It does not promote tooth decay.
- It is sodium-free.
- It has rapid solubility.
- It is heat stable and can be used in cooking and baking.
- Its pH stable.
- It has a long shelf life.
- It can provide a synergistic sweetening effect when combined with caloric and non-caloric sweeteners (more sugar-like sweetness profile than single sweeteners).
- It shortens the lingering sweetness of sucralose and aspartame.
- It enhances and intensifies flavors.
- It is approved for use in foods, beverages and pharmaceutical products in over 100 countries around the world.
- It is safe for the general population. Over 90 scientific studies have demonstrated the safety of Acesulfame Potassium.
