

Neotame Application in Pharmaceuticals

Neotame offers all the Functions and Benefits required for every pharmaceutical Formulation.

It imparts following Benefits :

- **It Maximizes available space**

Because Neotame is 8000x sweeter than sugar, only small amounts of it are required to provide the same sweetening potential as sugar. Using Neotame in Pills / Capsules and Tablets, it therefore maximizes the available space for the other APIs & Pharma ingredients. Therefore, it enables flexible shapes and sizes to satisfy the consumer needs & preferences.

- **It Masks Unpleasant Taste**

Neotame effectively masks the Taste of other Supplements, Vitamins, APIs, and other bitter ingredients. It also enhances berry, mint and citrus flavors. Hence Formulating with Neotame allows it to deliver a better tasting high-quality formulation.

- **It Safe for general consumption**

Neotame can be enjoyed by all segments of the population. It is safe for Children, Pregnant and Lactating women, Diabetics, and Phenylketonuria patients. Neotame is rapidly metabolized and completely eliminated by the body.
