Calcium EDTA Di Sod. : In Cosmetic & Detergent Industries :

- It is widely used in Beauty and Cosmetic products.
- It allows for better cleaning use, as it enables cosmetic products to foam.
- As it binds with Metal Ions, it prevents metals from accumulating on the skin, Scalp or Hair.

Examples : Soaps & Shampoos,
Lotions & Contact Lens solutions.

In addition, it is frequently used in products like,

- Laundry Detergents
- Industrial Germicides
- Cleaning products
